Thesis 1:

The logic of universities prevents rather than helps students to becoming innovative entrepreneurs.

Results:

- > Yes, I agree to it:
- > No, I do not agree to it:

- 
- > The success of Silicon Valley is not a result of college graduates but of college dropouts.
 - > Innovation is defined as successful market penetration of inventions (Schumpeter)
 - > The task of universities consists in preparing students to analytically understand different theoretical market models
 - > The goal of university education is to reach a diploma e.g. a level of performance defined within the academic system
 - > The goal of the economy, however, is to make money.

Thesis 1:

The logic of universities prevents rather than helps students to becoming innovative entrepreneurs.

- > Have you changed your mind? Do you agree to the thesis?
